

RESIDENTIAL

Station Place, Brentwood

Horizon Construction is delighted to present this construction project, Station Place, which was located in the high street of Brentwood's town centre. It involved the conversion, refurbishment and a vertical extension of redundant offices and commercial units to form 15 high specification residential apartments and 3 ground floor commercial units. The site was confined with limited external space and our team was trained in the use of 360 degree jibbed telehandlers to allow lifting operations.

-  Location: Brentwood, Essex
-  Client: South East Property Group
-  Architect: Arcady Architects
-  Project Manager: Vertice Development Management
-  Project Value: £2.3m
