

## Construction expertise you can trust

Horizon Construction was founded in 1999 by two of its directors (Phil Holding and Steve Tilley) with a passion to create a construction company which was different to others. Now in 2019, we are celebrating 20 years of trust in construction projects.

With offices in Colchester and London, employing over 50 people, we operate across a wide range of construction sectors throughout East Anglia, London and South East.

Having achieved many industry accolades along the way, we have become a leading construction organisation within our markets. In 2018, Horizon Construction achieved its highest turnover of circa £22m, which included projects up to a value of £7m.

Horizon Construction is defined by its exceptional people, a commitment to excellence and clarity on solutions.

## Committed to excellence

As a client of Horizon Construction, you will be supported by people dedicated to their profession, who provide leading expertise, insight, service and quality. Building personal and successful relationships with each of our clients is at the centre of our approach to all

operations. Our people are passionate about going the extra mile and being proactive in their approach to ensure projects are delivered to the highest of standards.

We are proud to have built a reputation of reliability and quality which gives our clients the confidence they expect in their projects.

## Leaders in construction

With some of the best minds in UK construction, our flexibility and talent-base allow us to deliver a broad range of construction solutions.
