

HEALTHCARE

Cavell Manor Care Home, Woodbridge

The project involved the construction of a modern, high specification two-storey 55-bed care home, with a basement housing the ‘back of house’ kitchen, laundry, plant room and welfare spaces, as well as a large cinema room and hair salon. Within the grounds, the project included the development of two 2-bed houses and six apartments designed and conditioned for sale to the over 50s.

The build was a traditional masonry structure with concrete floors and timber trussed roof, along with extensive external works, landscaped gardens and external leisure space.
