

## EDUCATION

---

### Chelmsford County High School for Girls

After the completion of the school's new sports hall and facilities (including teaching block) – see separate document – Horizon Construction refurbished and converted the original sports hall into a library, office and teaching facility.

The original sports hall and building dated back to 1906. Works included the removal of old equipment, demolitions and alterations to expose the earliest architectural form, and levelling of the final enlarged floor space.

Note: The photographs used in this document were before the library was fully equipped.
