Constructing excellence

Horizon Construction Group has completed over £300m of high-quality construction solutions and services since established in 1999.

Our portfolio in construction represents extensive relationships and projects across a broad range of sectors: automotive, commercial, education, healthcare and residential. Through our exceptional team of dependable construction professionals and a commitment to excellence, our clients' expectations are delivered with confidence.

With offices in Colchester (head office) and London, employing over 50 people, we operate throughout East Anglia, London and South East. The construction group has been recognised with many industry accolades and has become a leading force within its markets and a trusted source of construction expertise. Sustained organic growth has led to an annual turnover of circa £25m and projects valued between £500k and £10m.

Confidence in construction

We approach every construction project as an opportunity to demonstrate our expertise and commitment. From start to finish, we ensure projects are successful both on and off the construction site and without compromise on service and quality.

Utilising leading technologies to assist with efficiencies and adding value to the construction management process (includes ISO 9001, 14001 and 45001 certification), clients benefit from transparency, collaboration and meticulous detail in project management.

Our drive to continuously innovate and evolve leads to supporting our clients with the latest advice and best practices in construction methods to suit individual projects, including the community and environment they affect. This forward-thinking approach to our responsibilities in construction ensures support to all stakeholders.

Leaders in construction

With some of the best minds in UK construction, our experience and flexibility allow us to deliver a comprehensive range of solutions to our clients' challenges. Our values, ethos and family-like culture are the foundations of our service-orientated approach to construction and to building long-lasting relationships.
